

---

*(start with Cucumber)*

- ① Focus on one scenario
- ② Write failing step definition

*(drop down to RSpec)*

- ③ Write failing spec
- ④ Get the spec to pass
- ⑤ Refactor

*(when step is passing)*

- ⑦ Refactor

*Repeat #1 - #7  
when Scenario  
is all passing*

*Repeat #3 - #5 for discovered  
objects*

*Repeat #2 - #7  
until Scenario  
is passing*
